## Experience

● **Advance Application Engineer**

Accenture Phils.                    July 2023 -  Present

As a Backend Developer specializing in middleware integration for an ecommerce application serving a leading mobile device company, I play a pivotal role in ensuring seamless connectivity and functionality across diverse third-party APIs.

● **Software Engineer**

Algoforce  Inc.                    Dec 2022 - June 2023

Skilled in developing advanced back-testing techniques and leveraging machine learning algorithms to analyze market data, microstructure, and patterns. Proficient in enhancing trading platforms and implementing automated trading strategies within proprietary environments. .

● **Front-End and Python Developer**

Transcosmos Inc.                    Oct 2021 - Nov 2022

My role encompasses creating high-performing, responsive, and interactive web applications. I provide critical technical assessments and effort estimates for potential projects, ensuring thorough planning and execution. Engaging directly with clients in project update meetings, I offer valuable suggestions on their technical landscape.

● **Software Engineer Intern**

Impact Hub Manila                    Aug 2021 - Oct 2021

I participated in designing intuitive user interfaces and enhancing user experiences using Figma for UI/UX design. Create responsive and visually appealing web applications. Engaging directly with customers and clients, I effectively communicated project updates, gathered feedback, and ensured alignment with requirements. Additionally, I supported administrative tasks, including documentation, scheduling meetings, and organizing project files, contributing to efficient project management and team collaboration.
